

## About ROTOZIP®

ROTOZIP® was founded in 1972 when a professional drywall contractor sought a better, faster way to cut drywall. Focused on saving time and money, while improving his results, this single vision soon spawned a complete line of high performance professional tools, accessories and attachments for cutting a wide variety of building materials. Today, ROTOZIP continues to build upon the same strong foundation established over two decades ago as the world's number one Spiral Saw® system.

## Spiral Saws®

- **RZ2000** – Latest line of Spiral Saw technology, ideal for specialty cuts in wood, metal, Plexiglas, drywall, ceramic wall tile and even porcelain floor tile. Contains an integrated dust port, improved attachment interface and advanced 6A motor for more power and control. Constant Speed Control circuitry maintains speed under load.
- **CR18L** – 18V, 30,000 RPMs – The CR18L lithium-ion cordless spiral saw allows users to take the benefits of Spiral Saws anywhere. High performance cutting, paired with advanced lithium-ion technology, enhances productivity and minimizes downtime. Other features include: Non-Marring Depth Guide, Cast Aluminum Front Housing a built-in LED Information Display and a 20 percent higher power-to-weight ratio when compared to leading competitors.
- **RZ1** – 5.0 Amp Power, 30,000 RPM – Offers a soft band handle and a quick release foot. This Spiral Saw can be adjusted for cuts up to 1" deep. For added durability, Collet System includes 1/8 inch, 5/32 inch and ¼ inch collet and collet nut. Compatible with Zip Bits and XBITS.
- **RZ5** – 5.0 amps, 30,000 RPMs – This Spiral Saw features a Collet System that includes 1/8 inch, 5/32 inch and ¼ inch collet and collet nut, detachable handle, dust-sealed switch, adjust foot and soft grip body.
- **RZ10** – 5.5 amps, 15,000 to 30,000 RPMs – Featuring variable speed, a Collet System that includes 1/8 inch, 5/32 inch and ¼ inch collet and collet nut, dust-sealed switch, adjustable foot, metal bezel and detachable handle.
- **DR1** – 6.0 amps, 33,000 RPMs – In addition to improved ergonomics, making the tool smaller and lighter, the DR1 drywall-specific router features a handy on-tool wrench storage compartment, replaceable motor brushes to reduce jobsite downtime, vents designed to keep dust away from the eyes and a durable, hardened steel lock pin encased in solid aluminum.

## Accessories

- **XCORES™** – Three vacuum-brazed diamond hole saws certified for 33,000 RPM cut tile, stone and countertops up to 1 1/4 inches thick. XCORES operate at speeds ten times faster than existing premium tile hole saws and last four times longer.
- **XBITS™** – Features seven bits that are the strongest, fastest and most versatile bits ever for

cutting drywall, underlayment, laminate flooring, tile, metal, wood and multi-purpose materials. The diamond floor tile XBIT contains 2.5 carats of diamond grit and cuts through hard tiles such as porcelain and granite up to 1/2-inch thick. The XBIT line is contractor rated for maximum durability.

- **XWHEELS™** – Three four-inch diameter wheels, one for wood, one for tile and the other for metal, make clean, fast cuts when used with the XSHIELD in both open stock material or as a flush-cut blade.
- **ZIP®BITS** – An assortment of seven bits designed to cut through drywall, tile, cement, wood and other common building materials up to one-inch thick.
- **ZIP®WHEELS** – Three specially designed cut-off wheels designed to cut materials including masonry, metal, ceramic tile, brick fiberglass and laminates.

### **Attachments and Stations**

- **Tile Dock™** – The versatile tile-cutting station provides secure, stable and portable cutting support for quicker, more accurate cuts with less broken tile. A quick-clamping system secures tile sizes of any orientation and thickness.
- **ZM5 ZIP MATE®** – The ZM5 ZipMate right angle attachment is for use with high performance cutting wheels. It quickly and easily converts the RZ2000 into an ultra-compact circular and flush-cut saw, The ZM5 ZipMate is designed with a precision gear set for smooth, easy cuts with added durability for a longer life.
- **XSHIELD2™ Flush Cut Guard** – The XSHIELD2 Flush Cut Guard Attachment functions similar to the blade housing and guard of a cutoff saw, providing more versatility to cut faster, farther and flush. The attachment includes a pivoting die-cast aluminum foot for stability and quick blade adjustments up to 3/4-inch deep. A built-in dust port improves visibility. The XSHIELD2 works with both Zip@Wheels and XWHEELS™ and is available as a retrofit guard for older ZipMates on the market.
- **JSH5 Jig Saw Handle** – Converts the ROTOZIP into the only 360-degree jig saw with a stable base and comfortable handle for both horizontal and vertical work. Integrated trigger provides easier switch actuation and control while cutting, and a non-marring base moves smoothly over your project without damaging the finish.
- **DM5 Dust Management Kit** – Lightweight, flexible Hose routes along tool, helping you to maintain cutting control. A universal adaptor connects to most standard vacuum hoses
- **Straight Edge Guide** – Allows for effortless straight cutting and routing.
- **CRCT4 Circle Cutter Guide** – Enables fast, clean and perfect circle cuts in seconds with diameters ranging from 3.5 to 12 inches. Great for installing recessed lighting in ceiling tile or home audio in a wall.
- **Grout Removal** – Converts the ROTOZIP into a quick and easy grout-removal tool for 1/16-inch or wider and depth adjustment capabilities up to 1/2-inch.
